Subject: ACME Corp - Q3 Earnings Preview (CONFIDENTIAL)

Sarah,

Following up on our call with ACME Corp's CFO yesterday. Key takeaways:

1. Q3 revenue is tracking at \$4.2B, which is approximately 15% above street consensus of \$3.65B. This has not been disclosed publicly and won't be until the earnings call on August 14th.
2. They're planning to announce a \$2B share buyback program alongside earnings. The board approved it last week but it hasn't been filed with the SEC yet.
3. The acquisition of TechStart Inc. is expected to close by end of August. Purchase price is \$890M, which is a 40% premium to TechStart's last private valuation. This is still under NDA.
4. Their new AI product line is exceeding internal targets - they expect to revise full-year guidance upward by 8-12% when they report.

Please keep this strictly confidential and do not share outside the wall-crossed team.

Best,

John Smith

Senior Portfolio Manager
